CAREER OBJECTIVE

My career as a blockchain developer stems from my belief in the ability of Blockchain technology to revolutionize the internet as we know it. Through my years of experience, I have displayed myself as an acute problem solver, with an edge for developing creative and applicable solutions.

I am excited about partnering with you and bringing your project ideas into reality. I have worked on a wide range of projects, over time, and I have amassed quality experience. Nevertheless, I also love challenges and the growth opportunities that they bring.

EXPERIENCE AND PROJECTS

Web Developer Intern

ZURI

April 2022 - Present

- I Collaborated with designers and other developers to build real-time solutions to improve user experience by up to 41%.
- I Participated and briefed the development team on website research and web development optimization.

EphToken

Creator, Designer, Developer

March 2022

- I Developed an Ethereum-based ERC20 token smart contract that allows users to mint, store, transfer, and make transactions with the token.
- I Built a responsive frontend application to improve user interaction with the smart contract.

NFT Projects

Creator, Designer, Developer

January 2022

- I Created NFT projects based on the ERC 721 and ERC1155 Ethereum standards that allowed users to mint, store, and transfer the tokens.

Solidity Smart Contracts

Creator, Designer, Developer

February 2021 - Present

- Developed various functional smart contracts, which include an Online auction smart contract, a Crowd Funding smart contract, and a Blockchain technology online voting system
